

ABOUT US

ITRACOM Fertilizers Ltd (IFL), a subsidiary of ITRACOM Holdings Ltd which operates multiple companies across the region, is a leading fertilizer manufacturer specializing in the production and distribution of FOMI organo-mineral fertilizers, a unique blend of organic and mineral nutrients. FOMI Fertilizers not only support farmers in Tanzania but also reach markets across Africa, including Burundi, Rwanda, Uganda, Malawi, Kenya, and the Democratic Republic of the Congo.

OUR FACTORY CAPACITY

IFL factory has an annual production capacity of 1,000,000 metric tons, comprising: 800,000 metric tons of organo-mineral fertilizers, and 200,000 metric tons of blended fertilizers. The factory manufactures 14 types of fertilizers, designed for all crops and specific crop needs.

Vision

"To be a top class corporate in the production of quality organo-mineral fertilizers and other soil amendments in the region with dominant position in Eastern, Central and Southern African market"

Mission

"Enhance rapid agricultural growth through sustainable intensification of agricultural systems and fostering business excellence with focus on maximizing stakeholders' value by manufacturing and selling quality organo-mineral fertilizers in a reliable, ethical and socially responsible manner"

Values

"IFL is committed to deal in all aspects of business with expertise and reliability, passion and innovation, integrity and transparency and with utmost respect to the stakeholders, by honouring our belief and responsibility to provide goods and services of the highest quality."

OUR BRANCHES AND OPERATIONS

▶▶ ITRACOM Vilima Vitatu Phosphate Plant .

This branch is engaged in the mining and processing of phosphate rock into a form that is used as raw materials for FOMI fertilizers and can also be used directly as phosphate fertilizer, contributing to agricultural productivity in the region.

The facility so far has an installed plant with production capacity of 200,000 MT per year.
